

**IN THE SPECIFICATION:**

The specification as amended below with replacement paragraphs shows added text with underlining and deleted text with ~~striketrough~~.

Please REPLACE the paragraph beginning at page 9, paragraph 29, with the following paragraph:

The steam distributing pipes 22 allow the steam to be evenly distributed from the steam feed pipe 21 into all areas in the cooking cavity 11. The steam distributing pipes 22 are mounted to an end wall 21a, which is provided at an upper end of the steam feed pipe 21 to close the upper end of the steam feed pipe 21. According to one aspect, the steam distributing pipes 22 are ~~produced by pressing~~ pressed stainless steel. A size, a shape, a position, a steam discharging direction, and a number of the steam distributing pipes 22 are appropriately designed according to a size and a shape of the cooking cavity 11. According to one aspect, the steam distributing pipes 22 comprise four pipes, which are respectively arranged on the end wall 21a, and are uniformly spaced apart from each other at an angular interval. Outer ends of the four steam distributing pipes 22 are directed to different areas in the cooking cavity 11 to evenly distribute the steam to all parts in the cooking cavity 11, thus evenly heating the cooking cavity 11.
